PROJECTS

Jameez

Built and designed PHP based web app that allows users to cooperatively interact with a playlist to build 'the most popular set.' The app allows users to login, rank songs, view other users' rankings, and listen to songs in any order. The set and music player were integrated using the Soundcloud API.

EXPERIENCE

Addepar, CA, USA

Summer 2015

Client Solutions Intern

- Wrote scripts in Python to automate workflows for members of my team and add features for clients
- Added script that pulled tasks from Asana and sent email updates to owners of the projects
